

ASHUTOSH GUPTA

Senior Software Engineer | Backend (Python) & AI Platforms

ashuddeveloper@gmail.com • linkedin.com/in/ashutosh-gupta7 • github.com/ashuddeveloper • CodeChef: ashuddeveloper

SUMMARY

Software engineer with 6 years of experience building scalable, cloud-native backend systems and REST APIs in Python (FastAPI, Django, Flask). Designing distributed services and AI/agentic platforms at enterprise scale on Google Cloud. Strong in system design, LLD, and data structures & algorithms, with end-to-end ownership from architecture to production.

EXPERIENCE

Senior Software Engineer (Python Developer)

UKG (Ultimate Kronos Group)

Noida, India

Oct 2024 – Present

- **Architected and shipped** scalable, cloud-native backend services and REST APIs in Python/FastAPI that power UKG's enterprise workforce-management and Generative-AI platforms serving 1,000+ enterprise customers.
- **Led migration of** core services from Scala to Python/FastAPI, cutting feature-delivery time by ~30% and reducing maintenance overhead while modernizing the legacy stack.
- **Designed and built** an enterprise AI extensibility platform (Agents, Skills, Scripts, Commands, Hooks) with workflow authoring, validation, and automated testing — reducing workflow creation time by ~60%.
- **Owned** Low-Level Design (LLD) and modular, service-oriented architecture for new AI-platform capabilities, enabling delivery of 5+ new capabilities per quarter.
- **Deployed** containerized services on Google Cloud Run with secure secret management via Google Secret Manager, sustaining 99.9% uptime with zero credential-exposure incidents.

Tech: Python, Scala, FastAPI, REST APIs, PostgreSQL, Docker, Linux, Google Cloud Run, Google Secret Manager, ORM, Git.

Software Engineer – Game Engines (Python Developer)

Ingenuity Gaming Pvt. Ltd.

Noida, India

Nov 2022 – Sep 2024

- **Built** high-performance slot-game engines in Python from client math specifications, implementing complex probability models and configurable user-preference logic across 12+ live titles for clients including Light & Wonder, AvatarUX, Rogue, and Reel Play.
- **Developed** data-mining pipelines with Pandas to identify gameplay patterns and correlations, informing engine tuning that improved game performance by ~25%.
- **Hardened** reliability through unit and volume testing simulating 10M+ spins, catching critical defects before release.
- **Improved** code quality with SonarQube (reduced code smells by ~40%) and deployed containerized engines on AWS/GCP for scalable load testing.

Tech: Python, REST APIs, Pandas, Docker, Linux, AWS, Azure, PostgreSQL, SonarQube.

Python Developer (Implementation Analyst)

EZOPS Inc

Noida, India

Sep 2020 – Sep 2022

- **Built and maintained** automated data-reconciliation tools and ETL pipelines (Python, Pandas, REST/SOAP APIs, Selenium) processing financial data for clients including Wells Fargo, BNY Mellon, and SEI.
- **Developed** ARO Pypeline, a no-code data-transformation tool enabling non-technical users to clean, join, pivot, and transform data — cutting manual reporting effort by ~15 hours/week.
- **Applied** machine-learning algorithms to auto-match reconciliation breaks, improving match accuracy by ~30% and reducing manual review.
- **Automated** data extraction from Oracle and MS SQL (cx_Oracle, Pyodbc) and browser workflows via Selenium, eliminating ~20 hours of manual work per cycle. Promoted from Associate Intern within 6

months.

Tech: Python, Pandas, REST/SOAP APIs, Pyodbc, cx_Oracle, Selenium, Docker, Linux, AWS, Azure, MS SQL, Oracle DB.

KEY PROJECTS

Extensibility Studio / Python, LLM/Agentic AI, Google Cloud Run, Google Secret Manager

- Enterprise workflow-authoring platform supporting Agents, Skills, Scripts, Commands, and Hooks, with built-in validation, testing, and deployment pipelines to Google Cloud Run.

Bryte Generative-AI Platform (Activation & Control Panel) / Python, FastAPI, MySQL, REST APIs

- Backend services and APIs for feature activation and centralized administration of UKG's Generative-AI capabilities, with modular architecture supporting configurable AI functionality.

Data Science as a Service (DSAAS) / Python, Scala, FastAPI, Docker, Tortoise ORM

- Migrated enterprise Auditor backend from Scala to Python; designed LLD and built REST APIs for workforce analytics using async ORM patterns.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript (ReactJS)

Backend & Frameworks: FastAPI, Django, Flask, REST APIs, ORMs (Tortoise ORM, SQLAlchemy)

Cloud & DevOps: Google Cloud Run, GCP, AWS, Azure, Docker, Linux, Google Secret Manager

Databases: PostgreSQL, MySQL, MS SQL, Oracle, MongoDB

AI / Data: Generative AI, Agentic AI / LLM agent frameworks, Pandas

CS Fundamentals: Data Structures & Algorithms, System Design, Low-Level Design (LLD), Distributed Systems

Tools: Git, Bitbucket, GitLab, Jira, SonarQube, Selenium

EDUCATION

Master of Computer Applications (MCA) — 79.9%

Aug 2018 – Jul 2021

Institute of Engineering and Technology (IET), Lucknow

Bachelor of Computer Applications (BCA) — 62.31%

Aug 2015 – Jul 2018

Dr. Virendra Swarup Institute of Computer Studies, Kanpur

ACHIEVEMENTS & LEADERSHIP

- CodeChef — highest rating 1758 (ashuddeveloper); active competitive programmer. Microsoft Technology Associate (MTA): Database Fundamentals.
- Conduct monthly DSA & problem-solving classes for junior students; Academic Head at Parmarth Social Club; volunteer at Josh Talks.
